Installation Notice:

1. Our product is based on UL and MET electrical safety standard and uses one-end-AC-Input design to avoid the possibility of electrical shock on the opposite end of the tube; there is also a WARNING label on tube.
2. Safety design for our new LED fluorescent tube is our First Priority.
3. All ballasts (including magnetic or electronic) **MUST** be removed before installation.
4. All our LED Tube products are marked with the **AC INPUT** on one side of the end cap to identify proper orientation of the tube within the fixture or luminaire.
5. A qualified electrician is recommended for installation of our LED Tube products. Any questions or issues regarding the Fixture Rewiring and Product Installation, please consult your local Distributors or **earth-line** direct.
